2018 INPUT-OUTPUT SURVEY OF THE PHILIPPINE BUSINESS AND INDUSTRY

ELECTRICITY, GAS, STEAM, AND AIR CONDITIONING SUPPLY WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES

Jany to Docombox 2049

January to December 2010

Dear Sir/Madam:

The Philippine Statistics Authority (PSA) is conducting the 2018 Input-Output Survey of Philippine Business and Industry (IOSPBI). The 2018 IOSPBI will gather detailed data items on selected income, expense and inventories provided by this establishment in the 2018 Census of Philippine Business and Industry.

The data collected will be used to construct the inter-industry accounts or the input-output (I-O) table for the country. The I-O table is a useful tool for both the government and private sectors in analyzing interindustry linkages of the economy and for other studies like forecasting and price-cost analysis.

This Office is authorized to collect information from businesses and industries under *Republic Act No. 10625* (*RA 10625*). Section 27 of the same law obliges the establishments to provide required data. The information collected shall be kept strictly confidential and shall not be used for purposes of taxation, investigation or regulation as provided under *Article 55* of the Implementing Rules and Regulations of *RA 10625*.

We appreciate your utmost cooperation by accomplishing this questionnaire and providing PSA with a copy of the 2018 Financial Statement of your establishment. You may also accomplish the questionnaire online at PSA website (https://iospbi.psa.gov.ph).

Thank you very much.	For inquiries, contact:
LISA GRACE S. BERSALES, Ph.D. Undersecretary National Statistician and Civil Registrar General	Telephone Number: E-mail Adress: or esss-rcu@psa.gov.ph

CONCEPTS AND DEFINITION OF TERMS

INCOME refers to cash received and receivables for products/by-products sold and services rendered.

Valuation: Products and by-products sold and services rendered should be in <u>producer</u> <u>price</u> (exestablishment) net of discounts and allowances.

Producer price is the amount receivable by the producer from the purchaser for a unit of a product (good or service produced) as output, minus any VAT or similar deductible tax, invoiced to the purchaser. It excludes any transport charge invoiced separately by the producer.

Include:

- ✓ Goods transferred and services rendered to other establishments belonging to the same enterprise as
 this establishment. This should be treated as sales and valued as if sold to a customer.
- ✓ Income from products made elsewhere for this establishment on a contractual basis from materials supplied by this establishment.
- Sale of products/by-products to domestic market, transferred to other plants or establishments belonging to the same enterprise, directly exported and sold to exporters.

Sales to domestic market refer to sales of products/by-products of this establishment to another establishment of a different enterprise, and other consumers/users, including interplant transfers.

Interplant transfers are shipments of products/by-products produced to other domestic plants or establishments belonging to the same enterprise as this establishment. These should be valued as though sold.

Exports refer to direct exports and sales to exporters.

Sales to exporters refer to products/by-products produced and sold locally to exporters by this establishment.

Direct exports refer to products/by-products produced and shipped directly outside the country by this establishment.

EXPENSE refers to cost incurred by this establishment during the year whether paid or payable.

Valuation: Goods and services should be in purchaser price.

Purchaser price is the amount paid by the purchaser, excluding any VAT or similar deductible tax, in order to take delivery of a unit of a good or service. It includes any transport charges paid separately by the purchaser to take delivery at the required time and place.

Include:

✓ Goods received from and services rendered by other establishments belonging to the same enterprise
as this establishment. These should be valued as though purchased.

Purchased from domestic market refers to all goods bought by this establishment within the country or sourced from domestic market.

Imports refer to all goods purchased outside the country by this establishment.

INVENTORIES refer to stocks of goods owned by or under the control of the establishment as of a fixed date, regardless of where the stocks are located.

Valuation:

Stocks of materials, fuels and supplies should be at current <u>replacement cost in purchaser price</u> at the indicated dates.

Replacement Cost is the cost of an item in terms of its present price rather than its original price.
