CONCEPTS AND DEFINITION OF TERMS

INCOME refers to cash received and receivables for products/by-products sold and services rendered.

Valuation: Products and by-products sold and services rendered should be in **producer price** (ex-establishment) net of discounts and allowances.

Producer price is the amount receivable by the producer from the purchaser for a unit of a product (good or service produced) as output, minus any VAT or similar deductible tax, invoiced to the purchaser. It excludes any transport charge invoiced separately by the producer.

Include:

- ✓ Goods transferred and services rendered to other establishments belonging to the same enterprise as this establishment. This should be treated as sales and valued as if sold to a customer.
- ✓ Income from products made elsewhere for this establishment on a contractual basis from materials supplied by this establishment.
- ✓ Sale of products/by-products to domestic market, transferred to other plants or establishments belonging to the same enterprise, directly exported and sold to exporters.

Sales to domestic market refer to sales of products/by-products of this establishment to another establishment of a different enterprise, and other consumers/users, including interplant transfers.

Interplant transfers are shipments of products/by-products produced to other domestic plants or establishments belonging to the same enterprise as this establishment. These should be valued as though sold.

Exports refer to direct exports and sales to exporters.

Sales to exporters refer to products/by-products produced and sold locally to exporters by this establishment.

Direct exports refer to products/by-products produced and shipped directly outside the country by this establishment.

EXPENSE refers to cost incurred by this establishment during the year whether paid or payable.

Valuation: Goods and services should be in **purchaser price**.

Purchaser price is the amount paid by the purchaser, excluding any VAT or similar deductible tax, in order to take delivery of a unit of a good or service. It includes any transport charges paid separately by the purchaser to take delivery at the required time and place.

Include:

- ✓ Goods received from and services rendered by other establishments belonging to the same enterprise as this establishment. These should be valued as though purchased.

Purchased from domestic market refers to all goods bought by this establishment within the country or sourced from domestic market.

Imports refer to all goods purchased outside the country by this establishment.

INVENTORIES refer to stocks of goods owned by or under the control of the establishment as of a fixed date, regardless of where the stocks are located.

Valuation:

- Stocks of materials, fuels and supplies should be at current **replacement cost in purchaser price** at the indicated dates.

Replacement Cost is the cost of an item in terms of its present price rather than its original price.

- Goods for resale should be valued at **producer price**.
